PORTER'S NURSERIES

EVANSTON, ILL.

PLEASING EFFECT OF SKILLFUL PLANTING WITH PORTER'S TREES

FOR MANY YEARS we have devoted ourselves to growing trees suitable for planting in the finest grounds in and around Chicago. The knowledge so gained has enabled us to know exactly what to plant in different localities, when the planting can best be done and how to produce the very best results in planting.

PORTER'S QUALITY TREES

The quality of our trees cannot be excelled. They are watched carefully from the time they are seedlings till they mature into beautiful specimens with fine, spreading heads — it is a case with us of the survival of the fittest — poor trees are cut out; we do not allow them to grow. Plenty of space in which to grow is one of the things we insist on. This is why we secure the symmetrical growth so notable in our stock. Even with this care we could not secure results if we did not transplant and prune our trees, both in the roots and tops, at proper intervals, resulting in a fine root system and a multiplication of branches.

When you buy think of these features; your success depends on procuring stock that is right. Our long experience insures you against failure.

PLANT NOW

Trees may be planted from the time the leaves fall in the autumn till they come on again in the spring, with the exception that this work cannot be done when the ground is frozen too hard to admit of digging. Fall planting has its advantages over planting done in the spring, in that trees planted then get thoroughly set by the time spring arrives — they have had the advantage of the winter snows and early spring rains and are in a position to make an early start when the growing season arrives.

ADD VALUE TO YOUR PROPERTY

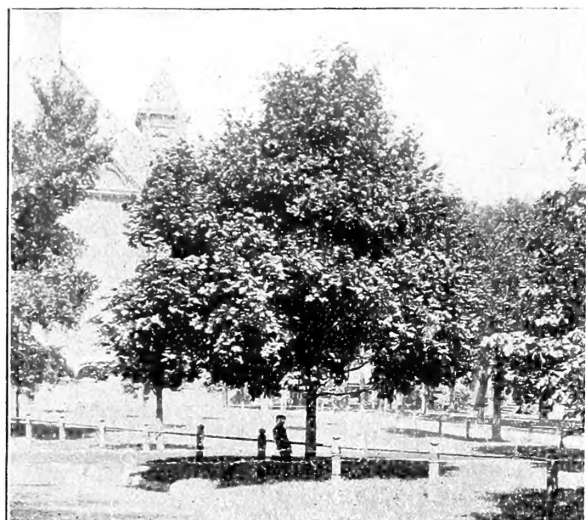

Trees should be planted on all property, whether improved or vacant. Nothing adds more to the appearance of a place and actually enhances its value.

Do not delay planting; it only means a small outlay, a little work — then, the trees work for you.

J. W. PORTER, founder of the Porter Nurseries

PRICE LIST FOR FALL 1913, PORTER'S NURSERIES, EVANSTON, ILL.

Norway Maple

PORTER'S SHADE TREES

NORWAY MAPLE.

This handsome tree with its wide-spreading head and dense dark green leaves is most desirable for all purposes. Its vigorous growth and freedom from disease recommend it highly. Our stock is unequalled.

	Each	10
8-10 feet, 1½ inch diameter.....	\$2.50	\$22.50
10-12 feet, 2 inch diameter.....	3.00	27.50
12-13 feet, 2½ inch diameter.....	4.00	37.50
13-14 feet, 3 inch diameter.....	6.00	57.50

CAROLINA POPLAR.

Probably the quickest grower of any. Its bright green shiny leaves give an impression of freshness and thriftiness—flourishes in a diversity of soils and will stand smoke and dust.

	Each	10
8-10 feet	\$.50	\$ 4.00

Planting of Spirea Van Houttei, Bridal Wreath

PORTER'S ORNAMENTAL FLOWERING SHRUBS.

We are not offering every shrub that will grow in our climate, but the very best—those that we have tried repeatedly with best results. It is possible to buy shrubs of the same height at quite a diversity of prices—the reason being that some are only of two or three stems and some bushy. The former are not satisfactory at any price. Our aim is to give you bushy shrubs with heavy roots, and this is what you will get from us—quality in shrubs, like everything else, is what counts. And this is what we are growing. Our shrubs will produce quick results. We have saved our buyers one or two years in labor, because our shrubs have been started right and are ready to go ahead as soon as transplanted into your grounds.

HEDGES

Japanese Barberry (Thunberg's)
Alder Buckthorn.
Coralberry.
Honey Locust.
Honeysuckle.
Russian Mulberry.

Lilac.
Privet in variety.
Snowberry.
Spirea, Ninebark.
Spirea Van Houttei, Bridal Wreath.

Prices of the above varieties may be found under their respective headings in preceding pages. Those kinds shown in heavy type may be severely trimmed with good advantage, resulting in a very thick hedge. Those in light type are suitable for a natural effect and should not be trimmed.

Of the many varieties used for hedging, the Russian Mulberry and the Privet are the most popular. The former makes a heavier, more woody hedge than the latter, but should not be used where there is much shade. For all positions, shady and sunny, the Privet may be used with equal success.

ROSES

2 Years Old—Strong—Field Grown.

From the multitude of Roses we have selected a few of the best growers, finest colors and hardiest varieties.

Prices: 35 cents each; \$3.00 for 10; \$25.00 for 100.

Climbing:

Baltimore Belle, pale blush.
Crimson Rambler, crimson semi-double—clusters.
Dorothy Perkins, shell pink—clusters.

Bush Form:

Anne de Diesbach, beautiful shade of carmine.
Francois Levet, cherry red.
General Jacqueminot, rich velvety crimson.
John Hopper, brilliant rose with carmine center.
Margaret Dickson, purest white, extra large.
Marshall P. Wilder, bright carmine red.
Mrs. John Laing, soft pink.
Paul Neyron, deep rose color.
Prince Camille De Rohan, dark velvety crimson.

Latest Novelty—Particularly Effective Planted in Masses:

Baby Crimson Rambler.
